

SILT FENCE INSTALLER TRACTOR

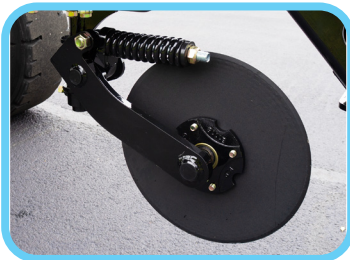

The Blue Diamond® Silt Fence Installer is essential for erosion control. Easily install silt fencing in a fraction of the time. The design allows a trench to be cut and installs the fence up to 20" deep without needing to pre-trench and backfill.

Two models are available to best suit your application; a fixed center mount fits most applications, or a sliding offset mount for installation near buildings or other structures.

APPLICATIONS INCLUDE:

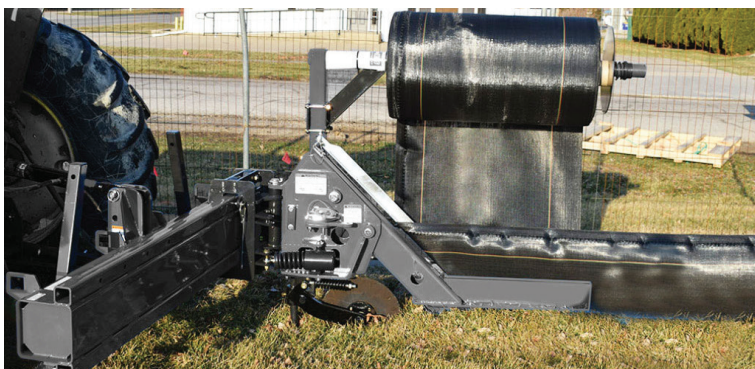

- Controls sediment runoff during highway construction and maintenance projects
- Containing sediment during land clearing, grading, and to put around vegetation

Spring loaded coultter blade

Plow tooth

Side shift mount

KEY FEATURES

- ◆ Trench and install fencing in one pass
- ◆ 40° pivot to either side of center for turning
- ◆ Fits up to 30" diameter roll
- ◆ Spring loaded coultter easily cuts through trash, roots and other debris
- ◆ Installs up to 20" deep
- ◆ Fits 36", 42", and 48" tall fencing
- ◆ Sliding offset mount allows for installation next to buildings/structures
- ◆ Install thousands of feet of fencing per hour
